These are product attribute names. Clicking on them drills down to a detail page for that attribute, organized by products associated with it. Outstanding issues such as incomplete or invalid content according to a retailer's requirements are noted, so that a data analyst can triage and fix necessary data gaps.

A filtering bar lets a user narrow down and triage by invalid or missing values, and can fix them in bulk by uploading new values in a modified spreadsheet, or via in-line editing.

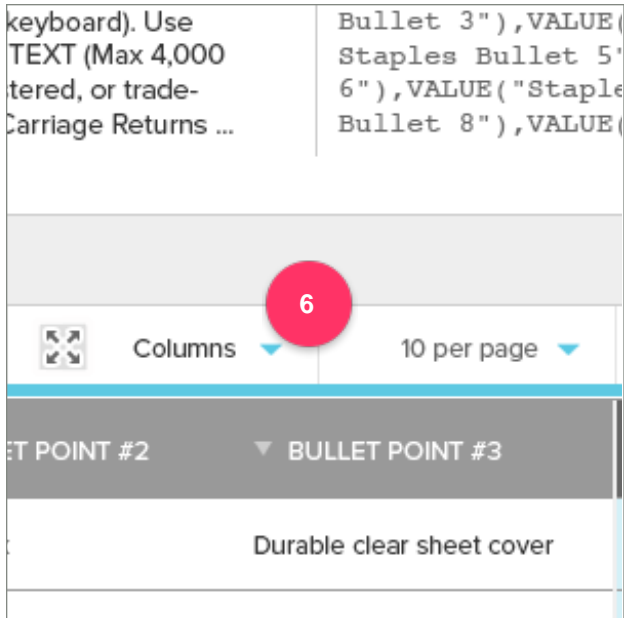

Comments:

Dean Wong on Mar 21 at 3:38am

To enable scrolling visibility to see more columns beyond the horizontal plane, a mini-map navigation control is used.
